SYNOPSIS OF CANADIAN NORTHWEST HOMESTEAD REGULATIONS

Any person who is the sole head of a family, or any male over 16 years old, may homestead a quarter section of available Dominion land in Manitoba, Saskatchewan or Alberta. The applicant must appear in person at the Dominion Lands Agency or Sub-agency for the district. Entry by proxy may be made at any agency, on certain conditions by father, mother, son, daughter, brother or sister of intending homesteader. Duties—Six months' residence upon and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 80 acres solely owned and cultivated by him or by his father, mother, son, daughter, brother or sister. In certain districts a homesteader in good standing may pre-empt a quarter section along the homestead. Price \$5.00 per acre.

Duties—Must reside upon homestead or pre-emption six months in each of six years from date of homestead entry (including the time required to earn homestead patent) and cultivate fifty acres extra. A homesteader who has exhausted his homestead right and cannot obtain a pre-emption may enter for a new homestead in certain districts. Price \$3.00 per acre. Duties—Must reside six months in each of three years, cultivate fifty acres and erect house worth \$300.00. W. W. COBY, Deputy of the Minister of the Interior.

N.B.—Unauthorized publication of this advertisement will not be paid for.
(J5 6m)

I have the agency for Monarch Ranges again and have them on hand at 25 per cent. lower than you can buy them elsewhere.—O. Boode, Nanton Nanton St.

For Sale, or Exchange For Land or Stock

One 25-horse-power J. I. Case Engine, fully equipped, government inspected; 6 Breaker Ploughs, also a Stable Plough, new and in first-class condition. Apply, Department M, 114-9th Avenue East, Calgary, Alta.
(A6-10)

the farmer, the dairyman, the stock raiser, the grain producer and the stock raiser. By his products he establishes the basis of all trade and without him any community, state or nation would starve to death. From the sale of his products he receives the money which is needed to fill his requirements. The retailer is compelled to lay in fresh supplies from the wholesaler, and by this evolution in trade proceeds on for the only result. Up to a certain stage the prosperity of the city, the community, the district and the province, depends upon the man who tills the soil, and through the concentration of his efforts, and the centralization of his labor, advancement depends.

One of the most common ailments that hard working people are afflicted with is rheumatism. Apply Chamberlain's Liniment twice a day and massage the parts thoroughly at each application, and you will get quick relief. For sale by Lacombe Drug Co., Ltd. (6)

Manufacturing Plants in the West

It is possible to profitably manufacture general lines of goods in the west. Not long ago it was an accepted fact that it was not practicable. But some people have an uncomfortable way of upsetting established facts. Just when it was positively proven that steamboats could never cross the Atlantic in a steamboat, just when it was positively proven that modern ships had naturally taken to the water, some one built one much larger than any preceding vessel and found it so much more profitable than smaller vessels that still larger ones were built.

Just when it was satisfactorily proven that manufacturing in the west could never be profitable, a few factories were established in Winnipeg which were so successful that plants began to spring up all over the west. Then it was said by the doubtful ones that they could pay in a few large points, but never in smaller towns. As if in decision of these prophets, industries began to spring up in almost all the towns in the west.

Today the west has more industries than the east had when it had the same population. Not only has it been positively proven that factories are possible here, but they are far more profitable here than elsewhere. Today no one who is in touch with the actual situation doubts for a moment that Alberta will become a thriving manufacturing center.

Some people will tell you that we have not all the raw material required. The writer had recently occasion to seek information on this head from a large manufacturing firm in England, and was told that the first shipped part of its raw material from Scotland, part from France and the balance from a point one hundred and fifty miles from home. The plant was located not where the raw material, which was all of a heavy nature, but where cheap power and good transportation could be obtained. The shipping of raw material is usually a great matter. Shipping of finished goods costs incomparably more.

Some still object that labor is not to be had here. Skilled labor is one of the simplest things in the world to obtain. It is in fact in touch with the situation would be surprised to learn the number of skilled workmen in various lines who are eagerly looking for openings in the west in order to be nearer their prospective investments for their savings.

There are many articles that can not well be shipped, and these must be made here. The families of the workmen employed include workers in other lines and provide the necessary labor for those lines, often rendering it easier to get such labor here than in other countries. One plant paves the way for the next, and so the procession goes on.

It is now known that most of Alberta is underlain with natural gas. Our supply of coal is so great that we cannot consume it. The water powers scattered through our Province are worth billions to us. Altogether they present a proposition for the manufacturer that is not to be equaled elsewhere. Laying is easier, simply because we are further than other from raw materials and when they are here living will be as cheap as in the east.

Our timber is suitable for a variety of purposes, and many other raw materials are found in abundance, but perhaps the chief of them all is our clay. From Alberta clay will yet be made goods which will afford employment here for many thousands of the unemployed, and bring to our late Province a wealth as yet undreamed of. An expert in this line some time ago expressed the opinion that the value of our clay for manufacturing purposes will far exceed the value of our soil for agricultural purposes.

Were all medicines as meritorious as Chamberlain's Colic, Cholera and Diarrhoea Remedy, the world would be much better off and the percentage of suffering greatly decreased. Write Lindsay Scott, of Indianapolis, Ind. For sale by Lacombe Drug Co., Ltd. (3)

Butchers, Attention!—Damron Bros. are offering their butcher business at Bentley for sale at a snap. See advt.

New Game Act For 1913-14

Benjamin Lawton, chief game warden of Alberta, has issued the game law for 1913-14, of which the following is an extract.

Shooting on Sundays is strictly prohibited, and it is necessary to obtain the consent of the owner or occupant of an enclosed land before any hunting is done, otherwise it is prohibited. No animal under the age of one year is allowed to be killed.

The only game and animals entirely protected are—Bengal tigers, leopards, panthers, cheetahs and wild cats, and the extent of two miles only may be shot during the month of October, while the shooting of prairie chickens, particularly, etc., at the rate of ten a day or one hundred in the season, is only allowed during the same month. The sale of this game is prohibited.

Deer, moose, one male only, and caribou, one only, may be shot during the month of November 1 to December 14 inclusive. Another short season is that of mountain goat, two only, and mountain sheep, two males only, which may be shot during the months of December and the first fourteen days of October. The longest season is that allowed for the procuring of otter and muskrat. These animals may be caught during the month of November, December, January, February, March and April. The season for mink, fisher or martens, is of five months' duration, November, December, January, February and March.

Sale of, purchase of, raising, rearing, keeping, growing, etc., is strictly prohibited between March 1 and September 20. They may be shot from September 1 to December 31. The sale of ducks and geese is prohibited for the same period as the foregoing birds, but the time for shooting is longer, beginning on August 25. No duck, goose, or other waterfowl, etc., is to be placed in cold storage between March 1 and September 20 following, while no one is to export game without a permit from the minister of agriculture. The game act protects the eggs of many game and many other birds, and it is prohibited to willfully disturb or destroy them. In the hunting of big game dogs cannot be used.

Big game cannot be hunted without a license, and game heads may not be bought or sold without the brand of the department. A license is also required for dealing in the flesh of any game or game bird. It is necessary for every person desirous of serving as a guide or camp helper to take out a license.

All birds are protected except crows, eagles, goshawks, buzzards, hawks, cooper's hawks, hawk, owls, blackbirds, English sparrows, grackles, juncos, cormorants, pelicans and magpies. The fees of the various licenses are as follows:—Non-resident license, \$5; resident license, \$10; resident big game license, \$25; trapper's license, \$1.25; guide's license, \$5; camp helper's license, \$5; game bird's license, \$10; market hunter's license, \$5.

Fines not exceeding \$500 and costs may be imposed for the infraction of the game act. One of the best butcher businesses in Alberta for sale at a snap. The store is located in Bentley, and has a large district at its back. Owner is selling because other business occupies most of his time. If you want to get into a business that will pay from the start, see J. H. Damron, Bentley.

Farm Lands For Sale

The following list of farm lands gives a short description of farms located in the prosperous and famous Lacombe district. A careful, definite and accurate description will be cheerfully furnished of any place on the list. You are sure to make good on any of the farms with any reasonable effort and very little capital.

These numbers to place the full address on your letter or card as follows:

P. S. LEWIS,
McLean Block,
Lacombe, Alta., Canada.

PRICE \$10 PER ACRE.
No. 65—N.W. 1/4, Blackfalds N. E. 1 Sec. 23, Tp. 30, R. 20, W. 4th. Terms, part cash.

PRICE \$20.00 FOR QUARTER.
Near Bentley, N.E. 1/4 Sec. 5, Tp. 12, R. 2, W. 5th, 160 acres. Raw land, all open, spring creek, school hall mile, 2 wire fence, school hall mile, sale phone. Terms, \$500 cash.

PRICE \$3.00 FOR QUARTER.
No. 66—S.E. 1/4 Sec. 9, Tp. 41, R. 20, W. 4th. 160 acres. Riding on land, 90 acres in plow, soil black sandy loam, well and spring creek, frame barn 14x32, log granary, school hall mile, 2 wire fence. Terms, \$1,500 cash balance easy.

PRICE \$1.80 FOR QUARTER.
No. 64—N.E. 1/4 Gull Lake, 160 acres raw land, 120 open, soil is black sandy loam and clay subsoil, four acres of lake in centre of land, fence 2 wire fence, rank growth of wild prairie vine and wheat. Terms are cash it is offered at this low price to get the money. One of the bargains on the list.

PRICE \$25 PER ACRE.
No. 63—163 acres three-quarters of a mile from Blackfalds, 35 acres been under plow, a nice clearing, farm, finest kind of soil, small frame house. Terms, \$1,500 cash balance easy.

PRICE \$19 PER ACRE.
No. 62—160 acres of gently rolling land, 60 acres in plow land, black loam, good well, log house, 6,000 feet of lumber to build with. Terms, \$1,000 down.

PRICE \$20 PER ACRE.
No. 61—160 acres, 8 miles from Ponoka, 50 acres in crop, but 20 loads of hay a year, rolling quarter right on the hog back, black loam a foot and a half deep, clay subsoil, good well, frame house, log stable for 30 head, cow shed, rural route telephone. Land at the price announced—\$20—Half down balance time.

\$3,500 FOR HALF SECTION.
Near Bentley, 320 acres of fine land, 100 open, some time balance wood, grass, trees country. Terms, \$1,100 cash, balance time.

PRICE \$10 PER ACRE.
No. 60—N.W. 1/4 Sec. 15, Tp. 41, R. 2, W. 5th, 160 acres of land, 20 acres of Spruce and balsam poplar, small barn on balance, a fine district, 160 acres can be cultivated, 2 wire fence, school hall mile, and good investment, very easy terms. Terms, \$1,600 time, or \$1,000 for cash.

PRICE \$38 PER ACRE.
No. 58—100 acres, 30 acres open, 175,000 feet of spruce timber, small well. Terms, \$500 cash, C.N.R. within 10 rods of this land; it might be a townsite.

PRICE \$25 PER ACRE.
162 acres, 80 under crop, 8 acres new, good spring and well, log house, cellar, log stable, shingled roof, for cash at \$25.00 per acre.

PRICE \$26 PER ACRE.
All of Sec. 35, Tp. 30, R. 20, W. 4th, a nice living section at a fair price; good terms.

PRICE \$32.50 PER ACRE
All of Sec. 7, Tp. 40, R. 20, W. 4th, close in, very fine investment; buy it and see your money grow.

Prices on the above list I believe to be under the actual value of these farms. Get out this list, you may need it to remember what the land in this district was selling for in the year of 1913. Any of these lands are cheap at \$50 per acre. Increase in value will be more rapid in the coming five years than in the ten years passed. It is selling too cheap, but if you are bound to sell I would like your listing.

P. S. LEWIS,
McLean Block, Lacombe,
Sunny Alberta, Canada.

P.S.—Don't forget that we haven't from nor roasted, and everything points to a bumper crop.

The sailing race for the Lake View Hotel cup was sailed on Saturday evening last. The wind was good and all the entries made last time. John McKenney won, with A. M. MacDonald a close second, only 30 seconds behind.

Miss Bryan, for the past year accountant in the Government Telephone Office here, has resigned her position. She will be succeeded by Miss Hester of Medicine Hat. While in the office here Miss Bryan has made a host of friends, who are sorry to see her leave.

V. L. Gage, of Nebraska, is looking over the Lacombe district. Mr. Gage was recommended by friends in the province to this part of the country. Mr. Gage says the grain and grass looks the best to him of any district in his travel of 2,000 miles. Of course he will locate here.

We are pleased to learn from travellers that citizens of Lacombe and district when away from home do not forget to speak a word for our town and country. Reports are floating about of what so and so told to parties on the train, and in at least some cases these talks have resulted in parties coming here to see whether such big things could be true. So far as we have heard, those who came not only admitted that what they had been told was true, but were of them say the truth was not all told, as what they saw was better than what they were led to expect.

CARD OF THANKS.

We so kindly thank our friends and neighbors for their sympathy and help during the sickness and death of our dear husband and father.

Mrs. R. A. Gowan.
Mr. and Mrs. M. O. Mieser.

Mr. Needham, from the Board of the Women's Home Missionary Society, will address a meeting in the Presbyterian Church on Wednesday evening at 8 o'clock. Members of the W.H.M. Auxiliary are specially requested to be present and to bring friends. All are welcome.

The farmers have brought a number of fine samples of grasses and grains to the Board of Trade office, but the best received to date is some timothy from the farm of J. W. Rimbo. It stands just under six feet in height. Who can beat this?

Rev. Theodore Price, of North Dakota, made a short visit with friends in the Lacombe district. Rev. Price was fairly staggered at the wealth of the grain and grass in the district, and he says the climate will agree with him. We are very glad, indeed, to welcome him and all of his friends.

The Jesse Fraser Agency last week put through a deal in which Messrs. Tracy and Pool of Denver, Col., become the owners of the south 4 Sec. 22-30-26. Mr. Tracy returned to Denver to close up his affairs there, and will bring his family here in the spring. Mr. Pool is remaining here.

The alleged forgery case, in which Louis Vismiere charges A. W. Burrell with forging a note for \$600, came up for trial on Thursday before N. E. Carleton, J.P. After the prosecution had submitted evidence Burrell was sent up for trial at the next session. A. W. MacDonald acted as prosecuting attorney for Vismiere. E. H. Jones looking after the defence.

I. Gibson started his binder on Monday morning in a 60-acre field of barley which he estimated will yield more than 50 bushels per acre. He has practically sold the grain for 70c cents per bushel. Outing should have been started a week sooner, but was delayed by unfavorable weather. The binder will not need to stop, as he has plenty of oats waiting for the barley to be finished.

We are pleased to learn from travellers that citizens of Lacombe and district when away from home do not forget to speak a word for our town and country. Reports are floating about of what so and so told to parties on the train, and in at least some cases these talks have resulted in parties coming here to see whether such big things could be true. So far as we have heard, those who came not only admitted that what they had been told was true, but were of them say the truth was not all told, as what they saw was better than what they were led to expect.

Mr. Belcher's Removal

Edmonton, Aug. 15.—Arthur Belcher, son of Lieut.-Col. Belcher, and manager of the Merchants Bank of Lacombe, has been appointed to succeed A. O. Fraser as manager of the Edmonton branch. Mr. Belcher is an experienced man. The Lacombe branch will be taken over by Mr. Shanks, late manager at Carstairs. Mr. Fraser leaves on Saturday for Vancouver. Mr. Belcher has already assumed charge of the bank's affairs here.

The loss of any desirable citizen is felt by a town, but there are few whose absence would be so much felt in Lacombe as Mr. Belcher. Coming here in the early days of the town, when the Merchants Bank first opened a branch here, about thirteen years ago, he worked his way up to the position of accountant, and when as no higher position was available to him here, was removed to another branch, only to return in a short time with the position of manager.

From the first he, in a modest way, made his influence felt in town by his steady assistance in everything that made for advancement, in social life, and in clean, healthy sport, he took a foremost place, and as years went by and his position in the bank became more responsible, he added to these a consistent help in the business of the town. He has been for years a member of the Board of Directors of the Agricultural Society, and has done a great deal to bring the society to its present high standard. In the Board of Trade he has been especially useful to the town and district, and his judgment has been very much depended upon in times of difficulty. He was elected president of the Board a year and a half ago, and still holds the position.

Mr. Belcher, too, has reason to remember Lacombe, as it was here he received the training that fitted him for the position to which he has been appointed. It was here that the best years of his young manhood have been spent, the time when the strongest attachments are formed. It was here, too, that he married Miss Mooney, eldest daughter of W. S. Mooney, then of Lacombe, now of Edmonton.

Mrs. Belcher's mother, Mrs. J. E. Belcher, her loss from the circle of which she has formed so important a part for many years.

However, we will try to forget our loss and heartily congratulate Mr. and Mrs. Belcher on the achievement that has come to them. It means a great deal for so young a man as Mr. Belcher to be placed in so responsible a position as that of manager of the Merchants Bank of Canada in Edmonton, but we feel assured that the qualities that made him a decided success here will do the same for him in the larger sphere.

It is sometimes necessary to go away from home to find out how well off we are. There is at this time a feverish anxiety extending over almost all the west that is absent from the business men, contractors, farmers, and in fact everybody is waiting with intense anxiety to know the result of the harvest. If it turns out well the prospects are the brightest. If frost or storm interferes, it means almost disaster. Merchants wait until it is assured before ordering goods, as the amount needed depends upon the outcome of the harvest. Those who think of building wait to see how the harvest will turn out before they dare start. And so all lines are held up.

But in this district all is different. The expressions heard every turn in most western towns are never heard here. The absence of failures in the past has made us less apprehensive, but the chief cause is that the nature of the farming here makes the outcome of the harvest relatively of less importance. In many places the grain harvest represents the only income of the year, while here it is supplemented by a steady income every month, and by many every week. In the year, from the products of mixed farming. In order to realize the freedom from anxiety and apprehension that this gives, it is necessary to spend some time at this season in the towns of the district where grain farming is the only industry.

ANGLO-AMERICAN CHURCH
Sunday, Aug. 24th-11 a.m.
Full Lake, 3 p.m., Bessley, 7:30 p.m., Lacombe.

U. F. A. FARMERS OF LACOMBE

We are requested to publish the following appeal to Lacombe farmers, signed by the U. F. A. of Lacombe. Are you aware there is a weekly market established in Calgary for your produce? Are you aware that the ladies of Calgary have established a Consumers' League, pledged to purchase the farmer's produce, direct from the farmer, at this market?

Think—Have you anything you could supply their wants with?

First, during the summer. Second, during the winter?

Let your local union of U. F. A. know. Let us endeavor to co-operate for our mutual benefit. Give this matter a little thought. It is not a wild scheme. It is an established fact that needs your help and the help of all your neighbors.

Farmers living 37 miles from Calgary are now sending in in charge of their own representative and doing well.

The following extract from a letter recently sent to Capt. H. J. Angell, Division by the secretary of the Consumers' League speaks for itself.

"During the investigations of the Consumers' League of Calgary, we discovered that the Lacombe District Association of the U. F. A. had passed a resolution requesting attention from their executive board concerning the opportunity now afforded Alberta farmers in the Calgary public market. That resolution was received with indifference."

The Consumers' League had the same indifference noted to them as to the public market from the mayor and city council.

"A month ago we decided to work out the problem the other way round. Get public opinion favorable, increase our membership largely, and quietly though firmly force notice by our votes from the authorities."

For a permanent market in Calgary we have three factors: (1) Organization of Calgary house keepers to assist and work out the Calgary end; (2) Organization of Alberta farmers to market their produce efficiently. This will need the co-operation of the Provincial Government and the C. P. R. It will need the winter's preparation of all three for a good market next season. Can you send news in this line? We suggest that every individual in the eight unions of the Lacombe district write to an individual on your executive board of your U. F. A.—not to the U. F. A. secretary. This delay of requests for action would probably receive notice. Their query now is, "What can the Alberta farmer ship to the public market during the winter? Could you get answers for me from individuals in your district?"

(Sgd.) MRS. H. A. SINGLY, Sec.-Treas. (pro tem) Consumers' League.

The Science of Fitting Glasses

The human eye has a lens like a camera. Sometimes this lens is too flat or too full to focus properly.

To correct this fault, one needs a pair of glasses. The eye, as we add lenses in front, or spectacles.

The business of an optician is to select the lenses which will be of most benefit, and to have all the necessary measuring and testing apparatus to tell you if it is Glasses you need or if you need medical treatment.

Marriage of Chief of Police

Married, at the home of the bride's father, Lacombe, on Tuesday, August 19, LeRoy B. Miller and Miss Lillian B. Schooley, Rev. T. Powell officiating.

The wedding was a quiet home affair, none but immediate relatives being present.

The newly married couple are among Lacombe's best known and most popular young people. Both have taken an active part in Epworth League work and other departments of church activity in the town, and have a host of friends who extend best wishes.

The wedding after the ceremony they left for the north on a honeymoon trip.

They will make their home in Lacombe, residing in the house recently vacated by C. E. Morrison.

TEMPLE.

The Weather

We have long considerable grumbling the last week over a little rain. A perusal of the daily papers, however, tends to change our tune. Apparently a succession of storms have poured over the continent, leaving destruction in their wake. In many places the loss of property has been very heavy, and there has been even some loss of life. In many places where the crops have not been seriously injured, they are so knocked down that harvesting will be a difficult operation. Here, however, we have been sheltered from all the storm and only gentle rains, a sort of side issue from the storms, have been our lot, and even these have come at the time when they caused the least inconvenience.

WARNING.

The public are hereby warned against shooting on the S.W. 1-25-40-27 W. 4th N. Township as will be prosecuted.

What This Sectional Fire-pot Means to You

The "Sunshine" has a straight-sided semi-steel firepot, extra heavily ribbed, and made in two sections. The two sections allow for contraction and expansion—which prevents cracking. The heavy ribs and semi-steel give extra strength and added radiating surface. Ashes cannot adhere to the straight sides which assure an all-over clear fire. This means the greatest heat from the fuel consumed.

News of the Lacombe District

Rocky Mountain House News

The Board of Trade are donating a silver cup to the person carrying all the greatest number of first prizes for stock at the fair. The presentation will be made on the same evening.

On Saturday last two members of the bridge gang went down stream with part of the false work. Ferryman Hase saw them coming and met them with his small boat. They were in the water for the experience.

The fishing party consisting of Mr. and Mrs. A. J. Brown, Mr. and Mrs. J. J. Lundy, Mrs. Day and Miss Dalton, returned home on Tuesday evening after an outing of two weeks spent on the Baptiste River and Jackson Lake. They report an enjoyable outing and a very successful one from a fishing standpoint. Mr. and Mrs. Wilcox returned the following day.

The nomination meeting, on Thursday evening to fill the vacancy created on the council by the resignation of H. L. Gault, passed off quietly. A. Lind was placed in nomination, only in the meeting, and just before closing time W. J. Kirby, under pressure, consented to stand. His papers, however, were headed in three minutes after the nomination closed, and Mr. Lind already had been declared elected by acclamation.

The Board of Trade are communicating with the C. N. R. authorities regarding the location of a station at this point. It is believed that the operating department will soon take over that part of the line between here and Stettin, and in view of the proposed municipal improvement here the citizens feel that they are entitled to some definite information as to the location of the station. In addition to this, a regular train service would be much appreciated.

One of the best butcher businesses in Alberta for sale at a snap. The store is located at Bentley, and has a large district at its back. Owner is selling because other business occupies most of his time. If you want to get into a business that will pay from the start, see J. H. Dameron, Bentley, at once.

Ponoka News

Heartfelt sympathy will be extended to Mr. and Mrs. Edward A. Martin in the death of their little son, Lyle H., which took place at their home on Sunday evening.

An exciting game of baseball was played on the diamond Thursday evening, when the team from Lacombe tried conditions with a local aggregation. The game was a good one, and very pleasant to witness. Ponoka had the best of the encounter.

Saul Freeman, of Bluff Centre, was in town on Monday, July 15, by the load of merchandise he took out with him, friend Saul must be laying up for the winter.

Owing to the rather inclement weather experienced the latter part of last week, the Boy Scouts struck camp on Saturday. During the few days they were under canvas the boys had a merry time, and had a slight attack of smallpox, was released from quarantine on July 31st. He has opened his shop, and welcomes his old friends back again.

Things are just coming put as ordered. The rain experienced during the week was what the grain required. Of course it has delayed haying, but has been of such a benefit to the grain that there is no complaining. This is about the most critical week of the year. Full moon, with a chance of frost, and of course a danger of hail. After Sunday there should be another respite for a week or two from frost.

"I was cured of diarrhoea by one dose of Chamberlain's Colic, Cholera and Diarrhoea Remedy," writes M. E. Gotthardt, Ontario. There is nothing better. For sale by Lacombe Drug Co., Ltd.

Fairview News

The sad news of the death of Columbus C. Cowman came as a severe blow to his relatives and friends. He had been a great sufferer for years. He came to Canada one year ago last May for his health, and had been feeling a great deal better until Saturday evening at 5.30, he was stricken unconscious and died Sunday, August 10th, at 1.30 p.m. Columbus C. Cowman was born in Madison, Ohio, U.S.A., Sept.

18, 1883, and was married to Rachel A. McCann, March 9, 1884. To their union were born one child, Blanche Elizabeth. He leaves to mourn his loss, besides his wife and daughter (Mrs. M. O. Munroe), one sister in Washington, D.C. The funeral services were held at his home Monday, Aug. 11, conducted by Rev. Jennings, the remains being laid away in the Lacombe cemetery.

Dameron Bros. are selling their butcher business at Bentley. See the advt. in another column. There is a snap here for someone.

MAN CONFESSES TO BEING A MURDERER

Edmonton, Aug. 13.—The confession of Otto Rudolph that he shot and killed Carl Gueting on July 26, caused the coroner's jury at Place yesterday to return a verdict of murder. The enquiry into the German boy's death was conducted by Dr. A. Form, of this city, who returned to Edmonton this morning.

The three German youths met on the steamer and all were bound for Canada. "I met Carl Gueting and Fritz Mauren on the day we left Germany for Canada," said Rudolph in his evidence. "I needed the money and knew that Mauren had a large amount on his person, that Gueting was in my way, and therefore I shot him first, and afterwards I shot and tried to kill my other friend, but did not succeed. This took place on Monday, July 28. After I shot and killed Gueting, I tried to escape from these parts, but was arrested in Edmonton."

Mr. W. S. Gussalus, a farmer living near Manning, Pa., says he has used Chamberlain's Colic, Cholera and Diarrhoea Remedy in his family for fourteen years, and that he has found it to be an excellent remedy, and takes pleasure in recommending it. For sale by Lacombe Drug Co., Ltd.

ARTHUR BETTY IS RELEASED FROM JAIL

Edmonton, Aug. 13.—The massive doors of Edmonton penitentiary swung open this morning to release Arthur Betty, the hair-trigger rancher, who, when he entered the portals of the jail five months ago, had little hope of obtaining his liberty before the expiration of the five years' sentence which had been imposed upon him for cattle stealing.

Betty's case is regarded as one of the most remarkable in the history of Alberta justice. Betty, along with Geo. Luff, a neighbor farmer, was charged with the theft of two steers, the property of another farmer in the district. Luff jumped his bail and fled to California, but so confident was Betty of being acquitted that he did not even go to the trouble of obtaining a lawyer to defend him.

On hearing of Betty's conviction, Luff voluntarily gave himself up to the police and confessed that he had shot the steers. Luff stated that he had killed the animals, as they were destroying his crops, and maintained that he had conspired with Betty to defend him. He was found guilty of the theft by Judge Lees at Wetaskiwin in March last and sentenced to five years in the Edmonton penitentiary.

On hearing of Betty's conviction, Luff voluntarily gave himself up to the police and confessed that he had shot the steers. Luff stated that he had killed the animals, as they were destroying his crops, and maintained that he had conspired with Betty to defend him. He was found guilty of the theft by Judge Lees at Wetaskiwin in March last and sentenced to five years in the Edmonton penitentiary.

BIG MILLING PLANT FOR WEST

Winnipeg, Aug. 14.—As a result of inspecting conditions in the west, Col. F. S. Meighen and Mr. W. H. Hutchinson, president of the Lake of the Woods Milling Company, have decided that important extensions to their plant in the west are necessary in order to handle the growing business.

Mr. Hutchinson said that it was practically settled that another mill of large capacity would be built by his company in the near future, to cost \$500,000. Where it will be located, he declined to say.

CANADA WILL GET ALL THE MONEY SHE WANTS

Montreal, Aug. 13.—"Canada stands well in the eyes of the financial world and will be able to get all the money she wants," said William Wainwright, vice-president of the Grand Trunk, on his return from London.

"The British investor will, however, ask higher rates of interest for his money than formerly, and will scrutinize more closely the class of security brought under his attention. Wildest schemes will be barred, but anything well-edged will command all the money necessary."

"Grand Trunk credit stands high, as is shown by the amount in which the million and a half sterling notes were taken up, the issue being largely oversubscribed and going to 14 per cent before I left."

"Financial men believe that the prospects are much brighter and that this fall the purse strings will be loosened and money become more plentiful."

"I found many over there who had invested in lands in the west, disappointed at the setback that has taken place. I advised them, however, to stick to their investments and they will surely realize handsome profits."

"If the crops are good this year Canada's continued prosperity seems assured."

M. Mecklenburg, the eminent eye specialist, will visit Lacombe on Friday, August 8th, and can be found at the Adelphi Hotel. Mr. Mecklenburg has had 26 years experience in the treatment of eye troubles and asks all those who have troubles that other experts have failed to remedy, to call and see him. (F23-4f)

PEACE AND COMMERCIAL PROSPERITY

Utter exhaustion on the part of Bulgaria strengthens confidence in the restoration of the Balkan peace. There are still dangerous elements in the situation. Bulgaria, after a war of most ferocious savagery, finds herself largely stripped of the spoils of her campaign with Turkey. Her former allies are so well satisfied that she cannot expect any assistance in dealing with her ancient foe. Turkey is in possession of Adrianople, despite the assurances of Premier Asquith, and the European concert would insist upon the observance of the Treaty of London, she may be expected to cling to it with stubborn persistence. "These are elements in this acute situation leading between the belligerents which may easily develop into a third war."

The Balkan states are, on the other hand, utterly exhausted. Their lands have been by default or are rotting in the fields. Their excitement a little abated, they will be led to see how completely their powers have been expended. Foolish and disappointed Bulgaria must accept terms that are humiliating to her.

The signing of the treaty should give stimulus to the fields of commerce. Distrust among the European nations has much to do with the financial stringency. With peace secured and confidence restored, large amounts of money will be set free for circulation; Canada, with all its opportunities for investment, will attract a goodly share of it. Good crops at home and peace abroad spell prosperity to the Canadian West.

WILD HORSES ARE BECOMING A NUISANCE

Reports from some sections of the great Peace River country to the north and west of Athabasca, especially in the Grand Prairie District, are to the effect that wild horses are becoming such a menace that steps have been taken to ascertain if help cannot be had from the Dominion Government in a solution of the question. As crops advance the trouble with the horses becomes more serious. These horses are thought to be the result of escaped pack and saddle horses from prospecting parties which strayed over the trail to the Klondike several years ago. The hardest of these manes to survive the rigorous winters and masting gradually produced a race of horses of wonderful endurance and with no inclination to be harnessed or tamed. Perhaps they will have to knock down these wild horses as is done in some of the western states where similar bands spring up in the years following the great rush of 1896 to California. At any rate, there is no joke about the situation for some of the settlers who have gone into certain districts in the Peace River country, and their appeal to the government demands some immediate move.

Harness and Saddlery

I have engaged an up-to-date Harness Maker and am prepared to do all kinds of repair work, as well as all kinds of new Harness and Harness parts.

Gurney-Oxford The Aristocrat of the Kitchen

After a glimpse into the kitchens of thousands of well managed homes throughout Canada, the Gurney-Oxford Range may truly be spoken of as the "Aristocrat of the Kitchen." It is the first range to-day in Canada both in point of appearance and cooking efficiency.

A bright nickel trimming that never tarnishes, a smooth polished top that never requires black lead, this range is to woman just one beam of gratification.

But besides its handsome appearance, the Gurney-Oxford more than fulfils the purpose every range is built for—successful cooking. It contains

CALL ON US—ASK FOR OUR NEW CATALOGUE, "STOVES AND RANGES"

Lacombe Furniture Store
Lacombe Alberta

a device called the Economizer which not only actually saves one ton of coal in every six burned in the ordinary range, but so regulates the heat in the oven that deliciously dainty cakes, golden brown biscuits, and light flaky pastry are sure results from every baking.

It is a range which elevates woman from the constant toil and labor in the kitchen to a higher level of life. Its Economizer allows her to go visiting or shopping and keeps a low fire ready for her return, when by simply turning the lever a hot fire is quickly produced.

Employ the Gurney-Oxford in your household.

ONE CAUSE OF THE MONEY SHORTAGE

No matter how large your income, if you spend more than you receive, you are bound to be hard up. That is what Canada has been doing. Perhaps other countries have been doing it, too, but we are chiefly concerned with Canada. For years we have spent more money than we have made. We would have gone in a hole long ago were it not that so many people have been coming into the country constantly, and bringing their money with them, and our great corporations and our municipal governments have been borrowing immense amounts and spending them in the country. If it had not been for these two factors operating, we would have gone bankrupt long ago.

A country can not permanently import more than it exports and continue to do business. It is a problem that our statesmen must wrestle with—how to make our exports larger, than our imports, if we are to have real wealth as a nation.

But the problem must in part be solved nearer home. Is our own district selling as much as it buys? Is the amount of goods of all kinds shipped from Lacombe greater than the amount going out, and consequently the amount of money coming in is greater than the amount of goods coming in (or of money going out) then our supply of money is increasing. But if the amount of money coming in is less than the amount going out, of course we will in time run out of money altogether.

We know of no way to settle this point, as figures are not available on the subject, but even if we are making money we would like to make more of it. If the wealth of the district is increasing we would like it to increase faster. The way a man gets rich is by spending less than he makes. This way a district gets rich is by spending more than it spends; that is by selling more than we buy.

We will not at present ask directly whether we should buy less, but rather, can we sell more. We do not like to have as well as we like to make, so we will keep to the more pleasant problem. Are we selling all we can? Are we producing all we can? The answer to these questions is not at all clear. We are ending with the answer last, we as a country sent to New Zealand in hard cash \$1,334,270 to buy butter. Now, anyone can see that if that butter had all been bought from parties in Canada, there would have been in Canada \$1,334,270 more money on the first day of March than there really was. During the first six months of the present year the United Kingdom paid for butter \$80,000,000, but not one dollar of it came to Canada, as we had no butter to sell; we were buying. Now, if Canada had had the butter to supply say a third of that amount, would it not be better than borrowing \$26,666,666, and a loan of that amount would mean a great deal to the west at the present time.

Are the Canadian farmers making all the butter it is possible for them to produce? It is scarcely an exaggeration to say that a hundred pounds might be made for each pound made at present. What would it mean to the money market if Canada supplied the whole of the United Kingdom's requirements and received the little \$120,000,000 per year paid for it.

Would it be too much to say that the Lacombe district as a whole can produce one hundred times its present output of butter? We do not know what the present make is, but it certainly will amount to more than \$25,000 a week all year round. If we made that \$250,000 per week it would mean something. And we can do it without diminishing any of our other products. We have land to grow the feed for cows enough to do it, and still leave a large amount for other purposes. In fact it would help the cattle business and the hog business to nearly an equal amount, making the amount of our sales to increase by something like a million a year.

Now, some will simply laugh and say it can't be done. Others will say they would not milk cows for twice that amount. Of course we could not jump to that amount in one year, as it would take time to work into the necessary number of cows. But the real problem is the labor. The cows can be secured, and the feed can be grown, but who will do the dairy work? This is the difficulty that costs most of our farmers a lot of good money.

Labor is not so hard to get as it has been, and it is likely to become more plentiful. But there is a solution to the milk-

ing problem. Farmers would hesitate to lose hundreds of acres of grain if they had to cut it by hand, and they hesitate to keep many cows if they must milk them by hand. But the milking machine is as much a success as the binder. Consequently it is as easy to run a dairy on a large scale as to grow grain on a large scale. The demand for dairy products is becoming a serious problem to the world, and no other place is so well prepared to come to the rescue as is Alberta. And at least no part of Alberta is in a better position to respond than is the Lacombe district. We do not believe the farmers are inferior to anyone else in ability. If the Lacombe farmers will not wait to follow, but take the lead in putting in up-to-date appliances for dairying, there is no reason why they should not be able to produce as much as it. Let the pioneer farmers have their thousands of acres of wheat fields. The hundred head cow barn is worth far more, and it is quite feasible. It will not be long until the milking machine is as common as the cream separator or the binder.

This is one way of selling more goods and getting more money into the district, but it is not all. There are many other ways of them. This one alone is enough for us to digest at one time.

A vast amount of ill health is due to impaired digestion. When the stomach fails to perform its functions properly the whole system becomes deranged. A few doses of Chamberlain's Tablets is all you need. They will strengthen your digestion, invigorate your liver, and regulate your bowels, thereby doing away with that miserable feeling due to faulty digestion. Try it. Many others have been permanently cured—why not you? For sale by Lacombe Drug Co., Ltd. (1)

CANNOT CHECK THE IMMIGRATION TO CANADA

According to the President of the Canadian West Towns Company, who was interviewed in Winnipeg lately, the attitude of President Wilson and the loaning money government in the crops of the western states is going to give a temporary check to American immigration into Canada.

But such an interruption in the stream of the line can be of but short duration. Americans do not come to Canada because the United States is no good, or because they have found it impossible to make a living over there. But because Western Canada is better, and because there are many more opportunities for the man with limited capital here than in the United States.

It is not to be expected that the American citizen who has spent the best years of his life in the avocation of farming across the line, who has reared a family of sons on a farm, say, two hundred acres, and who now in his old age, with his land worth considerably over the hundred-dollar mark, is going to come to Canada. That man has performed his pioneer duties, and without doubt will spend his remaining years where he is.

But, after locating one of his grown-up sons on the old homestead in the western states, that same man is going to make a big effort to raise sufficient money to send his remaining boys to Canada, where land can be secured at one-sixth the price—where opportunities are fourfold compared to the older districts, and where this same man can set up three or four sons to provide for the one boy at home. And, with the march of progress and a close scrutiny on the part of Canadians of the conditions which aid materially in improving the opportunities and life of the agriculturists of Western Canada, we are going to see in this country such an improvement in the situation that the American boy who comes here want to upland at \$25 an acre is going to make as much from his cheaper Canadian farm as does his brother back in the States on land at five times the price. The result will be that Western farmers are to be highly commended, and could be followed with much advantage as Canada, but all the money in the United States will not prevent hundreds of thousands of the brown and brain of the republic from finding their way to this Great and Last West during the next decade.

LOCAL IMPROVEMENT DISTRICT NO. 399

Lacombe, July 28. Council met, all being present, with Jas. Sharp in the chair. Minutes of previous meeting read, and it was moved by Foren, seconded by Storey, that they be adopted as read. Carried.

Moved by Eadie, seconded by Williams, that the gentlemen present be given a hearing before any other business be taken up. Carried.

Moved by Eadie, seconded by Storey, that the communication re road matter of Mr. Fleming be referred back for further information and Mr. Foren report at next meeting. Carried.

Moved by Storey, seconded by Kasha, that Secretary be instructed to transfer a copy of the letters received re railway crossing to the opposite parties. Carried.

Mr. Hunt's correspondence was discussed and tabled.

Moved by Williams, seconded by Kasha, that Secretary be instructed to forward petition to W. F. Puffer, M.P.P., saying that the council fully endorsed it. Carried.

Moved by Storey, seconded by Eadie, that Secretary be instructed to forward copies held by him to A. G. Burns, the said work having been completed. Carried.

Moved by Williams, seconded by Foren, that C. M. Shack does not receive any receipt for road work during 1913 for L.L.D. 20, W. 4, Div. No. 2. Carried.

Moved by Storey, seconded by Eadie, in amendment, that C. Shack be allowed pay for work done on road. Amendment lost. Moved by Eadie, seconded by Williams, that O. G. Walton's bill for road work be referred back to be certified before a notary public.

Moved by Eadie, seconded by Foren, that the following accounts be passed and Secretary instructed to pay the same:

Magee	\$ 4.95
C. Eadie	62.60
A. M. Campbell	.50
Lacombe Drug Co.	5.80
W. N. Morrison	41.50
C. B. Halpin	22.95
C. P. R. Co.	90.15
Mussons, Ltd.	290.82
Mussons, Ltd.	29.40
C. Davis	3.75
Christie & Bean	16.75
Tocher	.65
Eaton	2.70
L. A. Hill	96.25
L. A. Hill	9.00
L. A. Hill	66.95

Moved by Eadie, seconded by Foren, that Division No. 6 be credited with \$16 from Div. No. 5 for per value of division of road tools. Carried.

Moved by Storey, seconded by Williams, that Secretary be instructed to credit Div. No. 1 with \$452 and debit same to Div. No. 4, and also that Div. No. 1 takes ownership of two graders and eight slip scrapers from Div. No. 4. Carried.

Moved by Foren, seconded by

Williams, that Secretary be instructed to credit Div. No. 2 with the amount of \$108.50, and debit same to Div. No. 1. Carried.

Moved by Kasha, seconded by Storey, that Secretary be instructed to credit Div. No. 4 with \$212.50 and debit same to Div. No. 3. Carried.

Moved by Williams, seconded by Eadie, that the following pay sheets (labor) be passed, the chairman authorized to sign and secretary-instructor instructed to pay the same. Carried.

Stock owners are advised that Blackfly Vaccine, manufactured by the Health of Animals Branch of the Dominion Department of Agriculture, may be obtained in the Province of Alberta from Dr. J. C. Harcourt at Medicine Hat. The price is 5c. per dose in any number of doses, and the instrument for its insertion beneath the skin may also be obtained for the sum of 50c. (A bulletin may be procured from Dr. Harcourt describing this disease and the procedure to be followed, with a view to protection.) Orders for vaccine may be sent by wire to the officer above named and will receive prompt attention.

FREDERICK TORRANCE
Veterinary Director General.
Ottawa, July 31st, 1913.
(A20-3)

NOTICE

I wish to announce that I have removed to my new store on Nanton Street, where I will deal in New and Second-Hand Goods. It will pay you to give me a call if you are open to buy, sell or trade.

Just arrived, a bunch of Shotguns and Shotshells, which I will sell at 35 per cent. discount.
O. BOODE

Damon Bros. are selling their butcher business at Bentley. See the advt. in another column. There is a snap here for someone.

News of the Lacombe District

Wittenburg News

The Rev. Gould held a temperance meeting in the school house and gave an interesting lecture, illustrated by lantern slides. A large number attended. The meeting resulted in general favor of temperance.

Mr. Manly Cumberland is now in partnership with E. W. Light, of the Medicine Valley country. Owing to the increasing number of patrons, it keeps two men busy handling the business. They are prepared to buy chickens, ducks, geese and turkeys this fall, and will pay good prices. Now your chicken raisers get busy, as there is big money to be made in the poultry business.

A good crowd turned out to the dance in the school house, and everyone reports a good time. Jack Robertson was unable to attend the temperance meeting. After hearing the views expressed on both sides by those who were present, he decided to quit smoking. Jack is always open for good advice, providing he is handled right. As the cold weather is approaching Jack is going south. We are sorry to see him go, but he has to provide for the little ones for the winter.

Dewey Simons has returned from Lacombe greatly improved in health, where he has been under the care of Dr. Hynes. The crops in this district are all well advanced, and many of the farmers are cutting their barley and rye. Leo Benson was the first to cut barley and has one of the finest crops ever seen in the Medicine Valley.

Rainy Creek News

Chas. Carrist has been on the sick list for the past few days. E. Begert, of Calgary, was renewing old acquaintances in this community last week.

Mr. and Mrs. French, of Red Deer, spent a couple of weeks with their daughter, Mrs. H. Peterson.

Mrs. J. C. Carrist has been sick with rheumatism for the past two weeks.

The Rainy Creek Ladies Aid held another of their enjoyable monthly meetings at the home of Mrs. Geo. J. Carrist, Wednesday last week. The next meeting will be held at the home of Mrs. F. C. Nelson.

A birthday surprise party was given Saturday evening at the home of Mrs. E. C. Nelson, in honor of E. C. Nelson and Fred Carrist. The evening was spent in playing games, and refreshments were served.

Castor Gets New Post Office

Castor, Aug. 16.—The proposed new post office received another lift and was advanced another stage during the week-end, when Mr. Leo Dowler, architect and superintendent of construction for the Dominion Government, with headquarters at Calgary, arrived in the town on Friday evening last for the purpose of examining suitable sites. He spent some time in consultation with a number of prominent citizens, and before leaving the following morning had secured opinions on a couple of sites, which he will recommend to the department. Although some time may elapse before it is made public as to which of the sites will be selected, it is believed it is finally located, so that details of the storm were almost impossible to secure.

Mr. Dowler is also engaged by the Dominion Government to locate sites and secure opinions thereon, in other towns of the province where it has been necessary, owing to the rapid development of the towns of Western Canada, to provide more suitable postal accommodation, which the various heads of the public service are finding it difficult to keep up to the requirements of the expanding west.

Now that the government is in the mood for building offices, their attention might be called to the great need of an office in Lacombe.

Bentley News

A very pretty wedding took place at the home of Mrs. Julia Wells on July 30. The parties involved were Mrs. Vera Palmer, of Bentley, and Mr. Glen Hall, of Washington. The bridegroom was Miss Edna Hutchinson, and best man W. Wells. The wedding march was played by Miss Vera Palmer. After the ceremony, which was conducted by the Rev. H. R. Haddon, of Delburne, a sumptuous lunch was provided, which was heartily partaken of by all present. The photographer for the occasion was Mr. C. A. Farnham. The happy couple expect to stay a few weeks in Bentley after which they will journey to Washington, where they intend to reside. The people of the vicinity wish Mr. and Mrs. Hall a very happy and prosperous married life.

STORM DOES MUCH DAMAGE IN MANITOBA.

Winnipeg, Aug. 14.—Violent thunderstorms, accompanied by heavy gusts of cyclonic intensity, swept over Manitoba and southern and central Saskatchewan tonight, smashing down telegraph and telephone poles across the country, and in the cities breaking plate glass windows and prostrating heavy billboards. In Winnipeg and Brandon the storm is declared to be the worst in years, while at Rivers, a few miles north of Brandon, the elements are reported to have revealed the strength of a tornado, and created havoc with buildings and standing crops.

No definite confirmation, however, could be obtained up to late last night, the storm having obliterated telegraphic and telephonic communications. Attempts to reach the area represented to have suffered failed, the nearest approach being Manitoba, where slight damage was reported. At Selkirk, Man., the storm tied up the lighting and street railway services, smashing down poles and putting the wires out of business.

The storm area reached as far west as Regina and Moose Jaw, south to the international boundary, east to the Lake of the Woods, and north toward Saskatchewan. The downpour of rain has been almost continuous, while the heavy electrical disturbances give rise to the fear that many outlying farms and barns have suffered by lightning igniting fires.

The light service at Winnipeg suffered interruptions, fuses being repeatedly blown out. Parts of the city have been in darkness for several hours, though the service in the centre of the city is kept up fairly well. Newspaper offices and other all-night establishments have constantly to resort to candles to keep things moving, this being the only way. News gathering was badly hampered in the heavy lightning play on the wires, so that details of the storm were almost impossible to secure.

NEW DOMINION FARM SHOULD GIVE PRAIRIE FARMERS FRUIT

The Dominion Department of Agriculture has set to work along a new line that is worthy of a success which it is sure to meet. This is the establishment of a farm for horticultural experimental work for the prairie provinces. The farm will be located in Southern Manitoba, the selection and experimental work with fruit trees that will bring fresh fruit to the table of every prairie farmer will be the main object of the farm about to be equipped. Experimental work in various sections of the world lead one to believe that it will

be quite possible and before many years practical for every farmer to grow his own fruit instead of doing without, as is done by most farm families in the prairie, or using high priced canned and dried fruits that have been imported and the duty attached to the already high cost of living bill. The northwestern prairie states have had a hard time in getting fruits established, but the experimental work has brought out many hardy varieties of plums, apples, cherries, and such nut shrub trees. Many hardy Russian varieties were imported for experimental work in American climates. By crossing, grafting, trying seedlings and continually selecting hardier, and at the same time eating fruits, many new varieties have been brought out that have extended the fruit belts hundreds of miles beyond their old limits.

Our pines already grow, as fine strawberries and bush fruits as can be grown anywhere. With this much needed government experimental work in the wheat belts we may now await the day when home-grown apples, plums, cherries, and even peaches, prunes and apricots may be secured at the table of the prairie Canadian.

For Sale

Engine 22 H.P., Separator and 30 lbs. separator will be given to satisfactory purchaser. Apply to H. L. Brown, Lacombe. (A12-4c)

FOR SALE

1 Kitchen Table, 1 Stove (Heavy), 1 Cook Stove, 1 Iron Bed, complete with Springs and Mattress, 3 Folding Chairs, 1 Kitchen Chair, 1 Sewing Machine, 3 Pictures, 1 Round Burner Lamp, 1 Small Table.

By order, ED. BARNETT, (Aug. 6-4c)

The Week-End

The incident is really anything one cares to call it. It may be called the exposure of a professional demagogue. It may be called Tammany's revenge. It appears to us, at least, that Sulzer carries away what honors there are to the sorry business.

Latin-American troubles, prevalent just now, have their humorous side too. The deposition of the president of Peru, Leguia, was released from the penitentiary the other day, according to a despatch, which added: "He announced that he would go to Europe for his health."

Sulzer's record was not entirely straight. One or two episodes in his early career were raked up and used against him with little effect. Then in some way Tammany secured or brought to light evidence of misuse of the campaign funds and dabbling in stock market margins. Sulzer's wife says she is responsible for these matters, while the Governor insists she is not. It is more than likely that Mrs. Sulzer is responsible and that she was used as a tool by an agent of Tammany. Murphy's forces in the lower house of the legislature were strong enough to impeach the Governor. It was noteworthy that the Republicans, Progressives and some Democrats stood by him.

Grain passed almost unharmed through a very dangerous period of the harvest. The week ending was the harbinger of the full harvest, with the arrival of the full moon. Farmers consider their crops practically beyond danger from frost. There was no frost during the week, and nothing else to worry the grain except the rain, which in some spots lent the grain down slightly.

Tammany Hall as the defender of purity in public life. Yet the Tiger has successfully played off the lamb, and Governor Sulzer of New York State is (yet) change the metaphor somewhat, the "goat." Developments in the case are not concluded yet, but there is every reason to expect Sulzer to be impeached. The story is a decidedly sordid one, and yet it must be admitted the honors, such as they are, go to Sulzer.

Sulzer was a professional champion of "the people" and yet a sincere champion. He was the majority. He was young, comparatively poor, a brilliant speaker and a man of advanced ideas. Tammany Hall supported his candidature, although he was not their choice as standard-bearer. Sulzer was elected over the Republican and Progressive candidates. Soon after election, Sulzer declared himself leader of democracy in New York State, thus throwing down the gauntlet to Tammany. The break became violent when by Murphy's orders the legislature killed the "direct primary" bill, which threatened to rob Tammany of its power, and which Sulzer supported vigorously. Tammany threatened to "get" Sulzer, and succeeded.

"August Bebel," foremost advocate of German socialism, died on Wednesday. Herr Bebel took second place to the organization of German socialism, and the story of the rise of socialism to the position of a dominating factor in the German Empire is really the story of his life. He knew his life from many viewpoints. His father was a sergent in a foot regiment of the line. Commencing life in very poor circumstances, he soon learned the trade of wood turning, and wandered all over Germany in pursuit of it. What he saw helped to frame his political views. This was done and what he desired to accomplish are interestingly narrated in his autobiography, which was published in book length on German in this year. Herr Bebel, as leader of the social-democrats, the most powerful single body in the Reichstag, was a figure of great importance, apart from his work upon the people as an orator and writer.

Special envoy John Lind has arrived in Mexico, has landed, and begun his task of sizing up the situation. Despite all stories from Mexico City that he would not be allowed to land, that he would be arrested, and so forth, his entrance into Mexico was witnessed only by newspaper reporters, and his stay in Mexico City has been as peaceful as well could be. The world's press is busy discussing prospects of American intervention in Mexico, and as usual the tradition of "shirt-sleeve diplomacy" is being put to the test. President Wilson and Mr. Lind are, however, their efforts to stick to first principles appear to be working out nicely. Strongly advocating peace, and at the same time denying Huerta's recognition except possibly as a murderous jockey, which he undoubtedly is, their position appeared anomalous. Yet they are carrying it off. Meanwhile the correspondents are so filled with prospects of American intervention that they have forgotten the revolution itself, and so we have no means of telling whether it goes well or ill with Huerta's attempts to govern his people.

A BEAUTIFUL BABY

Gained Wonderfully After Being Put On A Well Known Food.

Mrs. E. Wagner of 34 Winifred Avenue, Toronto, in writing to "Baby's Food" says, "I have used 'Baby's Food' for my little daughter, born August 15th, 1912. She has gained wonderfully since I started giving it to her."

Mrs. A. J. Fergus, 1400 St. George Street, Montreal, writes under date of Oct. 12, "My little daughter, born Aug. 15th, 1912, has gained very much. She is a beautiful baby."

Mrs. J. F. Fergus, 1400 St. George Street, Montreal, writes under date of Oct. 12, "My little daughter, born Aug. 15th, 1912, has gained very much. She is a beautiful baby."

Mrs. J. F. Fergus, 1400 St. George Street, Montreal, writes under date of Oct. 12, "My little daughter, born Aug. 15th, 1912, has gained very much. She is a beautiful baby."

Macleod—Second Tuesday in October, February and May.

Lethbridge—Fifth Tuesday in October and Fourth Tuesday in April.

For Trial of all Civil Causes—

Wetaskiwin—First Tuesday in November and Fifth Tuesday in April.

Red Deer—Third Tuesday in November and Fourth Tuesday in April.

Medicine Hat—Fourth Tuesday in October and Second Tuesday in March.

Macleod—Second Tuesday in November and Third Tuesday in April.

Lethbridge—Third Tuesday in November and Second Tuesday in May.

Dated at Edmonton, Alberta, this Seventh day of July, 1913.

J. D. BUNT,

Inspector of Legal Offices.

(A20-3c)

Special Farm Land Listing

These properties are well developed, closely situated, and producing investments, and the price is made for a quick turn over. In and we will talk it over. F. S. LEWIS, Lacombe, Alberta.

PRICE \$20 PER ACRE.

No. 201—400 acres, 2 miles from R.R. station with siding very close, school just across the road. 300 acres can be plowed, timber for fuel, a good frame house 20x24, two story, plastered, good shingled roof, on slight elevation overlooking the valley and good well of water in the yard; frame shiping granary 16x30, painted and in new condition; dairy barn, concrete block foundation, large lot and will accommodate 20 cows; implement shed 20x30; made about a day's repair, but nearly new horse barn in good repair, will house all the teams the farm requires; a good poultry house; corals with well for stock; place is also watered by creek; will cut about 100 ton of native hay this year; a large field, in summer fallow. This place is best adapted to a dairy proposition. Terms can be arranged that you can meet.

PRICE \$30 PER ACRE.

No. 328—60 acres, that is being farmed by a tenant and well farmed; 110 acres in crop, mostly barley, this 1/2 lays almost entirely level; grain is looking fine (some of the crop is in hand); the balance of the

land is a fine park and it does make a show place; the house is a two-story frame, plastered and clean as a whistle, needs painting outside; roof is in good condition; two soft water wells supply the house and corals; one well supplies a swimming pool; a large garage, containing a large car; a new house, 3,000 bushels of wheat; it is the history of the place that it will be filled to overflowing. There has never been a famine year since and twelve long years have been years of plenty. Several log buildings remain that need repair. It is only six miles drive over a good road.

Reasonable terms can be had.

PRICE \$20,000.

No. 300—600 acres, more than 350 acres in crop; this is a fine ranch, a going concern. The buildings are all painted, house is painted, plastered, large rooms, small tenant house of three rooms; barn 50x24, painted red, 15 stalls, 9 box stalls over barn 24x32, added and painted; granary; power house; grinding room; all equipped with steam; power water supply; creek across the section watering all the fields and corals; large sheds for machinery; poultry houses; ice house; land is level and unbroken; surface except along the creek, telephone installed; lays on a beautiful valley with a view of the sunset hills; one of the best, if not the best, laying and brooding ranches in Alberta, the best of sunshine and success. I am always pleased to show the place and can get you fair terms.

Blackfalds News

Mr. J. Mantell is leaving shortly for his home town, which is situated in the Big Valley country.

Mrs. Trout left for a short visit to Sylvan Lake on last Tuesday's train.

The Mountain House train is now running seventeen miles west of the Mountain House to the end of the steel.

Miss Sweet and her sister are leaving for a holiday trip to Field, B.C., this week.

The grain is looking fine in this district. There seems to be every chance of a bumper crop.

Mr. Bishop, from Ponoka, is spending his holidays here.

Mr. Willis left for Calgary last week.

Mr. Webster, construction superintendent, was in town Monday night last.

We hear on good authority that the C.P.R. are putting in a new bridge shortly over the Blindman river.

Mrs. Brothor, who has been staying here for the past few weeks, left for Calgary last Sunday.

Miss Young returned from a trip to Glendale, Manitoba, last week.

We hear there is a likelihood of a butcher opening up here in the near future.

The baseball team are scheduled to play Red Deer at Red Deer during the exhibition week.

Mike Madden, the well-known railway contractor, was in town Friday last. He has finished his contract at Consort, and is moving to another piece of work eighty miles east of that place.

The town is badly in need of a good restaurant. The influx of men to and from the Mountain House warrants one.

Spruceville News

J. M. Southward has gone to Calgary to meet Mrs. Southward on her arrival from England.

The last week's rain has kept most farmers out of the lay field, but better weather is looked for from now on.

J. J. Kaska and H. J. A. Evans go to Lethbridge on Saturday next, August 23rd, to organize another branch of the U.F.A. there.

Barley will be cut this week, weather permitting. Heads containing 66 kernels O.A.G. No. 21, can be seen any day.

Spruceville school house has

been thoroughly done up in readiness for the opening, and a Waterbury heating and ventilating system is to be installed.

U. F. A. Notes

Quite a few of our members attended the annual exhibition at Edmonton and report a good time. The wet weather and mud interfered with the outdoor program very materially, yet the display in all departments, especially of live stock, was well worth the journey.

It pays to cease your labors for a few days each year and attend as many fairs and exhibitions as possible. It shows us what our neighbors are doing and brings home to us facts about progressive farming that we cannot realize in any other way. And while on this subject an idea occurred to the writer which might be carried out most readily.

We have here at Lacombe an agricultural exhibit the year around. It is here by virtue of government recognition of what constitutes a good district for experiment and progressive development. We mean the Experimental Farm, in charge of Mr. G. H. Hutton. This most

worthy institution is forcing to the front very rapidly, considering the short time of its existence, and much money has been and is being spent to bring it up to a certain ideal.

Additional ground has been purchased, fine large buildings erected, live stock departments increased in variety and numbers, and experts have been employed to bring out the best that is in everything. Those of us who fall to visit this farm, lack appreciation of the efforts being made there in our behalf, and also miss an opportunity to increase our knowledge of our own business. We fear that too little interest has been shown by us in this one of our best home institutions, and it is time we awaken to the fact that we can produce only hay and grain on our farms. A large number of vegetables, fruits, grains, grasses and other products are successfully produced there. Things as many think are not worth our while, yet the government is doing the experimenting for us and paying the cost. All we have to do is wait and watch, and then when an experiment has finally proved a success, we can go ahead and produce along safe lines and know that our endeavors have had a precedent to guide us.

It has been suggested that Lakeside Union set aside a day between busy seasons and gather in a body to pay our respects to Mr. Hutton and his work. He would no doubt be delighted to lead such a body of men from plot to plot and give a little condensed talk on each subject as it is met. We are sure to appreciate it as much as those in charge would appreciate our coming.

What we might learn about alfalfa would alone be worth the time spent, and it seems to us that more patience on the part of the alfalfa beginner would lead to inevitable success and success with alfalfa spells fifty per cent. more of successful farming operations.

Down in the States they are inaugurating alfalfa campaigns in territory where, until two or three years ago, it was thought impossible to grow it. Business men and boards of trade are taking up the question with the farmers and leading every aid and encouragement to the scheme.

There are other things at the Experimental Farm that are actually worth while. Let us go and see what they are. There will be offered those who have the temerity to say they have not profited by what they have

seen and heard. Let us carry out the suggestion.

Unfavorable weather conditions the past week alone prevented the huns of the binder in this vicinity. Quite a little grain, especially barley, has been ready to cut for several days.

We are advised that the binder twine is on the way, and it may be here at this writing. There have been several unusually delays, but the whole matter will come out right in the end, and almost everybody will be satisfied. The term "almage" is here used advisedly.

The unusual spectacle of a little hail was witnessed in the vicinity of Lakeside school on the 14th inst. The exception only proves the rule, that this neighborhood has been singularly free from destructive storms. It might have been a wider scope. Let us be thankful.

We once knew of a farmer who deployed a heavy crop because it took so much more strength out of the soil. This reminds us of the man who did not grieve because an accident deprived him of both feet. He said, "Oh, well, I guess it is all right; my feet were always cold anyway."

Next meeting, September 4th. Don't forget day and date. Secretary will aim to keep you posted by mail on any matters of interest.
